

## Tube Fabrication & Assembly

### Materials

- Mild Steel
- Stainless Steel
- Aluminum
- Copper
- others available

### Background

For over 20 years, CMP has been meeting the needs of our customers within the tube manufacturing industries by providing custom and standard manufacturing equipment, specializing in small diameter tubing. This has afforded us a unique advantage to apply our knowledge and experience in offering our customers a competitive choice for small production run manufacturing requirements.

Whether your need is to produce prototypes, samples or small production runs, CMP has the experience and resources to offer you quality parts at competitive prices. Our in-house engineering resources can also afford you assistance in product development to reduce costs through part design optimization.

### Fabricated Products

- Prototypes
- Samples
- Small Production Runs

### Industries Served

- Automotive
- Solar
- Furniture
- Food Packaging

### Capabilities

- Ø3/16" to Ø2" Tube Fabrication
- Manual Bending
- CNC Bending (Automated)
- Mandrel Bending
- Cutting
- Deburring
- End Forming (Swage, Flare, Bead)
- Notching
- Final Assembly Welding (MiG, TiG)
- Machining
- Surface Grinding
- 100% Inspection
- and more...
